

A one car non tire related Ford Explorer Rollover took my daughter's life July 8, 2001. Got obsessed with research on the vehicle - Ford and our Government knew this was an unsafe vehicle for "passengers" and "road driving" from the 1980's (formerly known as the Bronco). Their manual even states that... "This is not a passenger vehicle". It is meant for "off the road driving - between rocks". If so, why are they allowed on the road? Shouldn't they be hauled to - "the off road site?" They're saying they ARE NOT SAFE.... Why is it legal for them to be driven on the road? Why ... Because it would cost too much to get them OFF the roads. What price do you put on a life??????? How far will you go???? How many salespeople point out that when they load the family - Mom Dad and those precious kids - into the van for a test drive.... - Looks good but it's a killer. September 11th, 2001 took 3000+ lives and got the attention of everyone. Ford and Our Government take the lives of thousands every year because they don't do "rollover" tests and regulations WARNING PEOPLE THIS IS A HUMAN TRASH COMPACTOR. My child is dead. In the rollover it crushed her from her skull to her pelvis - and every vital organ. Her head went into her heart. Want to put your loved one in a SUV....??? She left Max 8 and Tiffany 4. Please tell me what I can tell them ... why their mommy died? Money??? Negligence? Ford is GOD and our Government doesn't give a damn. How is that being any different than the terrorist that takes innocent lives? Anyone wants to talk to me... please call... 815-728-0286. My name is Lynda Novak - I'm Karen's mom.
